***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/29/05 has been entered.

**EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Thomas Scherer, Reg. No. 45,079 on June 9, 2005.

3. The application has been amended as follows:

Regarding the **claims 9 and 19**, "A program product in which is recorded a program to be executed by the processor of a network printer, comprising" has been amended:

-- A computer program product embodied in a computer readable medium to be executed by a processor of a network printer, comprising --.

Regarding **claims 8 and 18**, line 1, "the execution" should be -- an execution --.

***Allowable Subject Matter***

4. Claims 2-20 are allowed. These claims will be renumbered as 1-19.

5. The following is an examiner's statement of reasons for allowance:

Independent claims 1, 8, 9, 10, 11, 18, 19 and 20 define a network printer comprising communication control means, language control means, print control means, execution means, alteration means, and monitoring means, wherein the communication control means extracts print job data on the basis of the received packet data. As noted by the applicant, see pages 10 and 11, filed on 3/29/05, the prior art of record to Ueda (U.S. Patent No. 6,538,764) fails to disclose "...extracting print job data...", "...exclusively executing either said communication control means, said language control means, or said print control means according to priorities assigned to each of these means," "storing the received packet data in a first memory," and "storing the print job in a second memory."

Regarding the independent claims 5 and 15, the prior art of record fails to disclose the network printer controller comprising the second monitoring means for determining the amount of print job data stored in said second memory and generating specific events on the basis of the results of the determination.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHAN S. PARK whose telephone number is (571) 272-7409. The examiner can normally be reached on M-F 8am-4:30pm.
